① *Pad types: I = digital-input, O = digital-output, I/O = digital input/output (bidirectional) , A=Analog IO*

② *Def default IO direction for digital IO*

③ *Output Drive Unit is mA, only Digital IO has drive value;*

④ *INT: interrupt support.*

⑤ *The power configuration of all GPIOs should be matched with the actual power supply,*
Otherwise it may cause GPIO overvoltage damage, please refer to the Hardware Design Guide for details
